States of Matter	Properties	Particle Movement	Particle Drawing	Examples
solid	Rigid Structure Holds its shape	only vibrate in place,		ice cube chair gold
liquid	takes shape of it's container	move more than solids can slide past eachother		laundry soap pee water
gas	expand to fit their container completely	crazy energy moving fast lots of collisions		smoke fart Body odor CO2 oxygen burp
 plasma	charged particles super high energy conduct electricity	moves like a gas highest energy		lightning lasers stars neon signs
