

We will be preparing to have presentations at three events:

1. Physics class demonstrations.
2. Hands on demonstrations for parent day.
3. Demonstrations for Mr. Turk's class.

For 1 and 3 you will be present, and can perform the demonstration while others watch if you want, or you can let them try it themselves (I think others enjoy it more if they get to try it out for themselves). For #2, you will need to provide instructions for the parents and siblings that come throughout the day if you do not want to stay the entire day. You may want to come up with one demonstration that can be used for all three venues, or you can do a different demonstration for each presentation opportunity. If you need help with materials, let me know what you would like me to purchase or provide. We have \$100 for the class.
